

Dear all,

Please note that since december 3, 2021, a modification has occurred regarding foreign flat jockeys in order to harmonize the rules between the races on the flat and over the jumps.

From now on, like a French jockey, foreign jockeys benefit from a weight allowance on the flat if they do not have 86 wins in this discipline.

We would therefore like to thank you for reminding the jockeys dependent on your Racing Authority not to forget to declare their number of total victories before the declaration of rides when coming to France. This information can also be specified on the clearance which must be received by the Licensing Service of France Galop at the latest the day before the declarations of rides. This is important when calculating the weight allowance they are eligible for.

We remind you that any undue weight allowance may be penalized by the disqualification of the ridden horse and a suspension of the concerned jockey.

Many thanks by advance,

Best regards

Sabrina DESPLANCHES
